

The Structure Group

About TSG

The Structure Group is a world leader in the supply of temporary elevated decks and structures. The company has been forged around its leading product, the TSG HeavyDeck. This steel frame, panel system boasts a weight loading capacity of up to 20kN per sq. m and allows TSG to specialise in temporary sporting arenas, showrooms, grandstands and structures.

A key supplier to the London 2012 Olympic Games, TSG installed over 30,000 sq. m of deck across 3 venues, including Greenwich Park Equestrian Arena, the largest venue outside the Olympic Park.

TSG is focused on being the sustainable solution to the events and construction industries, and is ISO 9001,14001, 20121 compliant.

The Structure Group holds massive stock of decking and temporary demountable structures. TSG can cater for all types of hire, whether fully installed, supported or dry hired. Manufacturing of TSG HeavyDeck takes place in-house, allowing for maximum responsiveness.

Based in the United Kingdom, TSG is already selling and supplying in a number of international markets, offering a solution that has not been seen before.

Contents

Track & Field

Track & Field

TSG HeavyDeck creates an IAAF accredited, self-levelling temporary running track, pole vault, high jump, long jump and shot put facilities that allow international standard sporting events to take place on virtually any site in your city.

In the interests of the environment and sustainability, why not bring the event to the people?

Temporary Arenas & Grandstands

Temporary Arenas & Grandstands

Fast build temporary venues creating field of play surfaces for global sporting events. The HeavyDeck Pod system can also create a unique space within the confines of the Grandstand, allowing for corporate entertainment, concessions & public access; unavailable with any other temporary system.

Stadium Conversion

Stadium Conversion

Temporary constructed elevated decks that can convert the core use of major stadiums to facilitate alternative sporting events. Examples include motor sport, athletics, equestrian show jumping, football, tennis and more.

Ice Rinks

Ice Rinks

Build an ice rink in a location of your choice rather than be governed by terrain. HeavyDeck enables the construction of the largest outdoor rinks in locations that otherwise would be impossible to use.

Car Parks

Car Parks

Quick build temporary HeavyDeck car parks to cover additional demand or increasing capacity in areas of restriction.

Multi-Level Structures

Multi-Level Structures

The truly unique abilities of HeavyDeck allow for the construction of multi-floor modular structures up to four storeys high. Interiors can be supplied either as a shell or to the most exacting clients design.

Showrooms

Showrooms

Capture the eyes of potential clients and forge relationships within TSG's highest grade temporary showrooms. Available as single or multi level structures, only your imagination will limit the possibilities.

Retail Stores

Retail Stores

Demountable structures for all major supermarket and national retail chains, that are used to keep a trading footprint whilst refurbishment or new build takes place.

Event Structures

Event Structures

TSG supply single and multi deck structures to the highest standard, supported by self-levelling and height adjustable flooring systems. A luxurious level of internal fit out can be achieved whilst working to time critical deadlines and to varying budgets.

Special Projects

Special Projects

Elevated level floor systems & internal mezzanine structures for the opening of the King Abdullah University of Science and Technology, Jeddah, Saudi Arabia. The logistical flexibility of TSG's systems maximised the efficiency of building the 10,000m² dining room, a theatre and exhibition centre. In addition we built an elevated glazed viewing area and private prayer room for the King of Saudi Arabia.

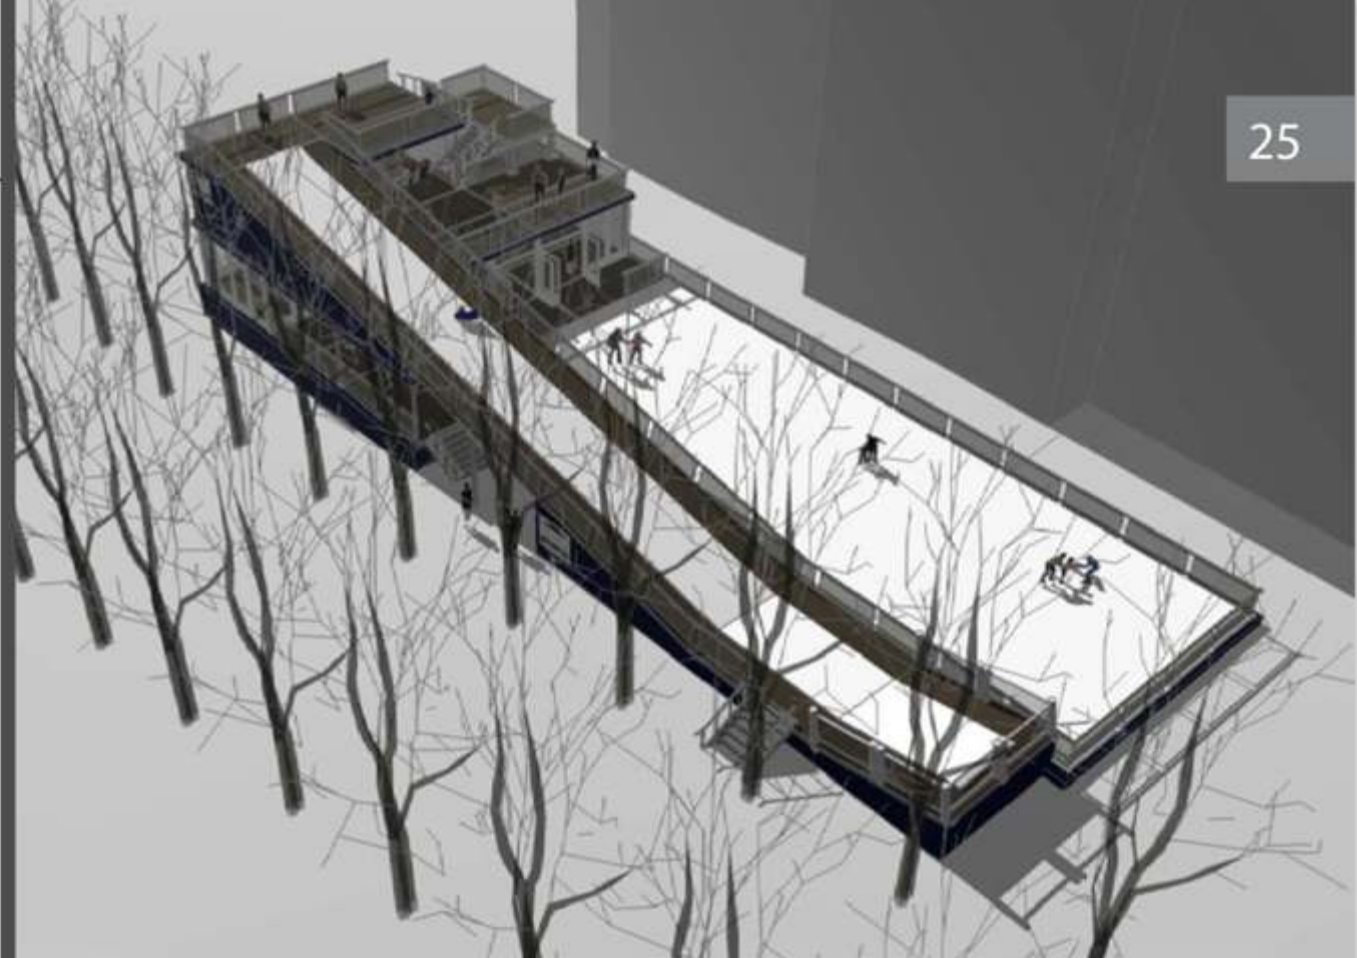

Development

Multi-level temporary hotels, military support structures and innovative retail structures are exciting areas of development for TSG's systems.
